

ADDITIONAL CHARGES

- €50 = Waiting time charge, rate per each started hour
- €50 = Empty pickup caused by the customer, order cancellation, goods not ready, etc.
- €95 = Dangerous goods (IMO, ADR) – FI, SE, DK
- 15% = Dangerous goods (IMO, ADR) – LT, LV, EE
- 25% = Temperature-controlled transport
- €8 = Delivery or pickup for a private person – LT, LV, EE
- €14 = Delivery or pickup for a private person – FI, SE, DK
- €40 = Delivery notification within a two-hour time window – if possible
- €80 = Fixed-time delivery
- €4 = Transport requiring personal driver notification
- €4 = Manual order entry by an HRX employee
- €5 = Correction fee for incorrect dimensions entered in the order
- 20% = Change of delivery address within the same country
- 50% = Redirecting the shipment to another delivery country
- €10 = Order cancellation after transport has started
- €3.5 = Preparation and application of address label per shipment
- €35 = Carrier fee, e.g. pallet replacement when transport safety requires it
- €10 = Wrapping the shipment in foil / applying additional protection
- €40 = Delivery surcharge for special postal codes
- €5 = For each pallet/package covered by the SENT system

The prices provided apply to one individual transport.

HRX Special Postal Codes – (For some destinations, access by domestic ferry or cable ferry is required.)

Finland zip codes: 00190, 21660, 21710, 25940, 25950

Sweden zip codes: 13025,13033,13036,13038,13039, 13041, 13042, 13043,13044,13055,13056,13492,14995,17892,18403, 18495, 18497, 18496, 18499, 18541, 18591, 18592, 18594, 18599, 29407, 26195, 37364, 43080, 43082, 43083, 43085, 44265-67, 45205, 45625, 45650, 45651, 45655, 47100, 47193-94, 47110-11, 47141-42, 47197, 47112-13, 47144, 47120-22, 47131-33, 47180, 47151, 47404, 47414-16, 47494-95, 47496, 47531-32, 47580, 47535, 47537, 47540-42, 47545, 47550, 47551, 47552, 47553

Latvia zip codes: 2008,2010,2015

WAREHOUSING

2–5 days = €1.50 / 100 kg / day

6–15 days = €1.20 / 100 kg / day

Over 16 days = €1.00 / 100 kg / day

The minimum charge is €25.

INFORMATION REGARDING WEIGHT CALCULATION

1 m³ = 333 kg

1 LDM = 1850 kg

Item length from 2.41 to 3.99 m = 2 × actual weight, however not less than 50 kg

Item length from 4.0 to 5.99 m = 3 × actual weight, however not less than 250 kg

Item length from 6.0 to 6.99 m = 4 × actual weight, however not less than 740 kg

Item length from 7.0 to 9.99 m = 5 × actual weight, however not less than 1500 kg

Item length above 10.0 m = 6 × actual weight, however not less than 1850 kg

FIN pallet (120 × 100) is calculated as 925 kg when higher than 120 cm / 0.5 LDM

EUR pallet (120 × 80) is calculated as 740 kg when higher than 120 cm / 0.4 LDM

Half pallet (80 × 60) is calculated as 370 kg when higher than 120 cm / 0.2 LDM

Stackable pallet, any dimensions, however not higher than 120 cm

IBC container 1000L (120 × 100) is calculated as 925 kg or actual/volumetric weight if higher

IBC container 1000L (120 × 100) – stackable, according to the higher actual or volumetric weight

LOADING METER WEIGHT IS APPLIED

When non-standard cargo is transported.

Dangerous goods (IMO, ADR) – always calculated as LDM when placing other goods above, below, or next to the shipment is not possible.

METHOD OF CALCULATING CHARGEABLE WEIGHT.

For the calculation of parcel and/or pallet weight, the higher of the actual weight, volumetric weight, or loading meter weight is applied.

- The volumetric weight is determined by multiplying the maximum shipment dimensions (length × width × height).
- The result obtained is then multiplied by the applicable m³ coefficient.
- The loading meter weight is calculated by multiplying the length and width of the parcel/pallet and then dividing the result by 2.4.
- The obtained result is then multiplied by the applicable LDM coefficient.

The total shipment weight is calculated by adding the individual weights of the pallets and/or parcels included in the shipment.
